BTS Launches New Cybersecurity Insurance Program with techrug to Protect Local Businesses

*Leading Managed Technology
Services Provider (MTSP)
Delivers Innovative
“Dual Claim Coverage” Model to
Minimize Wait Time and
Eliminate Hassle*

BIRMINGHAM, AL – January 25, 2024 - BTS, a leading managed technology services provider (MTSP), announced today they've launched an exclusive cyber insurance program with techrug to make coverage smoother, faster, and more complete for small to mid-sized businesses (SMBs). As insurance claims have increased in frequency in recent years, so too have tricky contracts and ambiguous wording in many popular cyber insurance policies. The unfortunate result is that there have been numerous “gotcha clauses” where clients who thought they were covered, were not covered due to technicalities. As an authority in the IT space, BTS has put a stop to this nonsense with its innovative new “dual claim coverage” - whereby both the technology provider and client are covered directly by techrug if a breach occurs.

In the case of an incident, this alignment eliminates any finger-pointing or drawn-out reimbursement processes that have plagued the insurance industry for decades. BTS negotiated this special program with techrug by submitting its proprietary “technology stack” to heavy scrutiny and it’s specifically been approved for clients. This “win-win-win” cyber insurance program is protecting clients so they have certainty that they’re covered, it provides with techrug higher insight into client networks and gives BTS an ability to expedite claims when necessary, due to its alignment in incentive.

For example, a local company was previously paying \$9,000 annually for \$1 million in cyber protection, but the policy limitations still left room for ambiguity. After BTS introduced its new program, the same company now pays \$7,000 for enhanced \$1 million in coverage plus additional benefits, including the “dual claim” model. This streamlining provides immense relief, gives them immediate access to disbursements and keeps them completely covered in the event of an incident.

“One common flaw with most policies is that the MTSP and client are supported by different insurance companies,” said Roger Wentowski, President at BTS. “When an incident occurs, if the insurer perceives that the MTSP didn’t do something properly, they will not pay. Whether or not that actually occurred, the difference in perception is enough to cause costly delays for the client. While the MTSP and insurer argue, the end result is that the client is effectively penalized because they have no choice but to wait for an unpredictable amount of time while those two companies resolve their conflict. However, with our new program, if a breach happens, clients are no longer subject to that costly waiting period. Since we have a ‘dual policy’ with techrug, our clients will receive immediate disbursement to keep their business operational, regardless of who is to blame for the incident, because techrug insures us, too. The benefit to our clients is that way they will receive immediate relief while we later diagnose at what level the cyber incident was caused. Since techrug insures both of us directly, our claims get

paid out immediately without passing blame back and forth and wasting precious time, which is vital for client businesses during such an event.”

Standard cyber insurance policies are riddled with complex exclusions used to avoid or delay payouts. However, this partnership with techrug has eliminated any of the worries of “fine print,” covering costs related to investigations, notifications, equipment damage, lost income, and regulatory penalties. By simplifying coverage, clients avoid nasty surprises during already stressful breach events. “Cyber insurance should provide true peace of mind, and frankly, we don’t understand how anyone else can promise peace of mind, without aligning incentives via ‘dual claim’,” added Wentowski.

This insurance innovation enables swift recovery, preventing clients from absorbing losses because of policy and procedural delays. Paired with BTS's validated security stack, it offers businesses an air-tight defense against growing cyber threats.

ABOUT BTS TECHNOLOGIES, INC.

Founded in 1976, BTS Technologies is Alabama’s leading managed technology services provider. The company’s mission is to increase its customers’ profitability, improve their productivity and give them a competitive advantage by implementing the right technology. BTS Technologies is the only provider that protects its customers from the two risks of technology - obsolescence and

cost. As its customers’ trusted technology advisor, BTS Technologies has earned the position as the market leader and its customers’ business through quality products and services.

BTS Technologies is a premier Member of Technology Assurance Group, an organization of leading managed technology services providers (MTSPs) in the United States and Canada representing \$800 million in products and services. This means that the organization is the ultimate resource for Managed IT Services, Cybersecurity, Cloud Solutions, Business Phone Systems (VoIP), and Video Surveillance. BTS Technologies delivers future technology today! For more information, please visit please call 205.290.8400 or visit us at www.askbts.com.
