

# InfoSet™ 408

## Helping Small Business Achieve New Heights.

It takes big business thinking for small businesses to realize their dreams. Consider InfoSet™ 408 — the voice/data communications solution for accelerating small business growth.

## Non-Stop Productivity.

InfoSet 408 from NEC is an integrated telephone system that packs big business benefits into a small system solution. Cost-effective results through increased productivity and efficiency — that's the heart of InfoSet technology. Imagine consolidating all of your office tools, data devices and phone lines together on one convenient, affordable communications network.

By putting you in control of your communications, InfoSet empowers you to take your business anywhere you need. Freedom and flexibility are key components to this sophisticated system. Pick and choose whom to talk to and when, with distinctive ringing and digital phone Caller ID. InfoSet centralizes and organizes your communications activities so you can find time for priority tasks.

## Growth for Small Business.

InfoSet puts a unique blend of voice/data features to work — for you. Its unrivaled versatility makes it the ideal choice for retail stores, professional and legal offices, restaurants, warehouses, architectural firms, home offices and more. InfoSet's cost-saving features — which include long distance call

tracking for quick verification of account charges — can positively impact your bottom line. From quicker customer processing via credit card reader hookup, to extra security with door control from your phone, InfoSet handles it all.

For extra support, add the optional integrated Voice Mail system, equipped with auto attendant. Rather than losing valuable manpower to repetitive tasks like giving out directions or operating hours, let InfoSet announce them — and promote a business event or a sales advertisement as well. Your business keeps running whether you're there or not.

## The InfoSet Terminal — Performance at your Fingertips.

The InfoSet desktop terminal offers convenience, functionality, programmable keys and intelligent, helpful features and capacities. They harness the power of integrated communications in an attractive and ergonomically designed package. Available in both display and non-display models. NEC offers a variety of choices that work best for your business. Built-in speaker phone and wall-mount capability meet your flexibility needs.

## Making it Easy to Communicate.

InfoSet is designed to get you up and running fast. Purchase and installation couldn't be simpler. InfoSet is pre-packaged, and PC programming is HTML-based for easy Web-like programming. It requires no special tools or complicated rewiring. Maintenance information is just a click away on your Web browser.

Accelerate your communications potential with InfoSet, and watch your business take off to new heights. Get ready ... get InfoSet ... and go!
